Craig Storm-swept Last Thursday

Cabins wrecked - one death - boats
long overdue

During a storm commencing on New Years Day and lasting three days, the town of Craig suffered much property damage and the death of one citizen. On the second day, January 2, James Comus was instantly killed by a tree which was blown down on his cabin, crushing him as he lay in bed. C. Erickson narrowly escaped a similar fate, having left his cabin only a few minutes before his cabin was wrecked by a falling tree. Numerous other cabins were blown down by the force of the gale.

Fishing Demoralized

On the West Coast the fishing industry is temporarily demoralized by the severe weather. On January 4th, four fishing boats had not reported for eight weeks and six had been at anchor fourteen days on account of bad weather.

Other West Coast points were

visited by the gale but Craig sustained the brunt of the damage. At Hydaburg Indian village the natives were panic stricken. Two children received minor injuries and several houses demolished.

Red Men

Install Officers.

The members of Stikine Tribe I.O.R.M. installed the officers of the tribe Tuesday at the regular meeting. The Chiefs are: Sachem, F. E. Gingrass; Chief of Records, L. M. Churchill, Collector of Wampum, P. C. McCormack, Keeper of Wampum, J. E. Warden, Prophet, C. A. Emery, Senior Sagamore, D. F. Lewis; Junior Sagamore, H. Dawes; Guards of Wigwam and Forest, E. West, and J. H. Wheeler, Sanaps, Wm. Cook and E. A. Lindman, Warriors, Ole Johnson, C. H. Borch, C. Benjamin and J. C. Ensley; Braves, J. G. Grant, W. Taylor, S. J. Hooper and E. Carlstrom.

Danish Butter.
Danish farmers are the best butter-makers in the world.

High Arctic Brothers Resent Grand Camp Actions.

Past Grand Arctic Chiefs and Grand Arctic Recorder denounce actions of Grand Camp. Keller says wont sign charters for southern camps.

Skagway, Alaska, January 9.—J. M. Keller, Grand Arctic Recorder, returning today stated, in an interview that he would refuse to sign charters establishing camps outside the jurisdiction of the Brotherhood and expressed himself highly indignant of the steam-roller tactics of the Grand Camp in Vancouver. He said "My office is flooded with protests from Alaska camps showing that delegates voted contrary to instructions of their camps."

Past Grand Arctic Chief, James W. Hill, an A. B. for thirteen years and life member of Fairbanks camp, and Past Grand Arctic Chief Dr. Keller, a charter member of the mother camp at Skagway, felt that the delegates have acted contrary to their instructions and that the establishment of camps below the original jurisdiction would disrupt and destroy the order.

Firemen's Helmets Come On Dolphin.

The long-looked-for rubber coats and helmets for the members of Alert Fire Company, arrived in on the Dolphin last night, after a long and tiresome journey from New York City where they were manufactured. There's a white rubber coat for the chief with helmet of same color, black coats and helmets for the others except the Foreman and Asst. foreman whose helmets are as red as the fire they are to fight. The coats are of good quality of rubber and will undoubtedly shed rivers of water. The helmets are the regulation shape and make, designed to protect the wearer from floods or an occasional blow on the head if the wearer is exposed to falling timbers.

When the newly elected Asst. Foreman J. J. McTague was introduced to his helmet yestarday, he remarked it was very heavy and was told that it was purposely so to protect the head. "Yes," he said, "It will save your head, but how about your back?"

No matter how about your back, they are the regulation article and will be useful if the time when they are needed (but we hope will not come) comes.

Jail Bird Flown.

Marshall Schnabel warned to look for Oscar Weston - searched Dolphin and Northland as soon as they touched here.

Oscar Weston who has been serving six months jail sentence in Ketchikan, broke from custody Tuesday evening, just previous to the sailing of the Dolphin and so far, has evaded the search of officials. The local marshall's office was informed of the jail-break and thinking Weston had gotten aboard the Dolphin in an effort to make a getaway, searched the steamer as soon as she touched here yesterday. The Northland was also searched today with no result.

Weston has served two sentences in Wrangell. He would have been taken to the Juneau jail on the Dolphin had he not made his escape from custody.

Fruit of the Sapota.

The very finest chewing gum is gathered from the fruit of the sapota, and Yucatan Indians like it so well that they allow very little to be exported.

Alert Firemen Elect New Officers.

At the meeting of the Alert Fire Company in the Town Hall, Monday evening, the following officers were elected to serve for six months: President, Wm. F. Schnabel; Vice President, Leo McCormack; Secretary, Harold F. Dawes; Treasurer, J. G. Grant; Foreman, F. E. Gingrass; 1st. Assistant Foreman, J. J. McTague; 2nd Assistant Foreman, Edward Josephus LaBonteous.

"Holy City" Pictures Coming Here.

Manager, J. R. Bender, of Bender's Picture Show, announces that he has in transit to show here soon, the films of the "Holy City" taken from the song by the same name. The play has been styled "The American Passion Play" and promises to be a great attraction.

WE recommend **ARROW** Shirts to our customers because we would rather have permanent customers than transients.

WE handle a full line of the famous

ARROW COLLARS

BECAUSE we know they represent the fullest value it is possible to secure.

They are made of shrunk fabrics in exact quarter sizes, and they also have the graduated cut-out interlinings which render them practically non-crackable.

They will prove their worth in the wash and in wear.

15c each

ARROW SHIRTS

Are good shirts — they'll stand wear as well as washing — and they come in so many good patterns that we are sure to be able to please you.

Persistence Produces,

Whether in the guise of "Good Luck" or just plain persistence without the wishbone and four-leaf-clover trimmings it has been oft writ, Persistence Produces. During the past year many changes have taken place in Wrangell, all, we believe, for the better. New industries and civic improvements have multiplied to everyone's benefit and we are fully launched on another cycle of prosperity.

But you begin to say "What's on your mind? Why this persistence talk? Let's have what's

on your mind," and when you get to these words, (COMMERCIAL CLUB) you will wink knowingly and say, "I told you so," because you've heard such an organization mentioned in the Sentinel heretofore. However, if persistence has anything to do with the organization of a Commercial Club in this town, some day the Ed will be pardoned, or at least be permitted to roam at large on parole.

In boasting for such a club, the Sentinel has not thought to gain personally any more advantages than any other business house. It don't expect to get a

job of printing prospectuses which might be kicked about in Council Chambers until even after 1915. But like the other institutions of the town hopes to realize a better, bigger and more prosperous town from which with other institutions, to draw legitimate business.

Two heads are better than one, even if one is a mighty good one. There are a lot of problems that will confront the town that cannot be dealt with by an official body. Maybe some are on the horizon or in shooting range now. How about the Parcel Post System? Does it concern you in any way? Are you harassed individually by something that would not harass you collectively? Business methods all O. K? Does your newspaper give your town publicity? Is it the right kind of publicity? Have you ever helped the Sentinel give the town proper publicity? After looking over this paragraph which resembles a census form sheet is there one or more suggestion of a use for such an organization? Is there a reason why representatives of the local business houses should not get together and up-to-date?

THE BRANDING OF SHEEP.

Method Advised That Prevents Injury to Wool or Skin.

M. Rollin has just described to the National Society of Agriculture of France an excellent method of marking sheep, reported in *Les Annales*.

The sheep can be branded with a hot iron only on the cheeks or forehead, which are bare of wool, or on the horns. Hence many farmers and merchants make use of pitch or coal tar to mark the wool. But these substances become inseparable from the wool, "or, rather," as Rollin remarks, "they melt and spread when the grease is being removed from the wool, blackening and soiling the fleece."

Traces of them are found in all ulterior operations and even in the tissues. Skin and wool dealers buy such fleeces at reduced rates. Hence it is desirable to find another method of marking. It has been proposed to use aniline colors, but this is even worse, since the colors do not merely soil the fleece, but actually dye it.

Other means are not lacking, notably that of tattooing the ear of the sheep. Also a small metallic plate can be fastened in the ear, as is done with African sheep to prove that they have been "clavelized"—i. e., inoculated with the special serum which combats their dangerous and contagious eruptive malady, rot or scab.

The Syndicate Chamber of Commerce and Industry advises the employment of a color composed of linseed oil, essence of turpentine and prussian blue or similar color. It recommends marking on nose, forehead or nape of neck.

Natural Gas in Kansas.

The quantity of natural gas produced in Kansas in 1911, according to the United States geological survey, was 38,739,406,000 cubic feet, valued at \$4,854,534.

The estimated consumption of gas at cement plants was 13,272,417,000 cubic feet, valued at \$720,911, an average price of 5.5 cents per thousand cubic feet. Zinc smelters used an estimated quantity of 13,186,505,000 cubic feet of gas, valued at \$543,371, an average price of 4.12 cents per thousand cubic feet, the price ranging from 1 to 7½ cents. Brick and glass works used an estimated 3,594,287,000 cubic feet of gas, valued at \$191,140, an average of 5.3 cents per thousand cubic feet, the price ranging from 3 to 9 cents.

Although no new gas fields were reported for Kansas in 1911, considerable development work was accomplished in the old fields of the state, resulting in the discovery of some very good wells, a total of 301 productive gas wells having been completed during the year.

Locating Gasoline Leaks.

To locate a leak in the intake pipe or carburetor connections of a gasoline engine fill a common oil can with gasoline and, with the engine throttled down, squirt the gasoline on and around the different joints. When the faulty joint is reached the engine will speed up quite perceptibly, the acceleration depending on the size of the leak.

Facts and Figures.

Items and Data concerning Alaska, gleaned from the Governor's Report to Secretary of the Interior.

The decrease in population, accompanied by a falling off in freight shipments and loss of business prosperity, has been witnessed chiefly in the interior of the Territory. The southeastern region as a whole is much more prosperous than ever before, because of the expansion of the fishing industry and the stable development of gold quartz mining operations in the Juneau district.

The importations of liquors from the United States has steadily decreased since 1907.

There must be some Alaska sawmills besides Wrangell's. The increase of lumber transports last year was only 7,132 ft. greater than in 1907.

Southeastern Alaska, as far west as Sitka, showed the greatest advance in merchandise importations during the year, gaining \$2,077,312. over the 1911 aggregate.

At Cordova, the cost of the Customs office in collecting \$1. was \$303 while in Sulzer it was \$11.89.

There are fourteen incorporated towns in Alaska.

SIMPLE VEHICLE JACK.

Handy and Inexpensive Device For Raising Wagon Bodies.

One of the simplest forms of jacks for use in lifting the bodies of wagons or other vehicles is illustrated in the accompanying drawing. The device can readily be made by any amateur, and the construction is inexpensive.

The uprights of the jack consist of a single length of iron 1 1/4 by 1/2 inch, bent double or to hairpin form, with the lower ends secured in a block of wood measuring 2 by 6 inches. The ends of the uprights are fixed into recesses in the block and are held in place by means of bolts as indicated by dotted lines in the drawing. The

SCIENTIFIC AMERICAN, N.Y.

VEHICLE JACK.

lever on which the vehicle axle is supported is made of strap iron measuring 1 by 1/8 inch. This is fulcrumed between the uprights by means of a bolt which passes through holes in the sides of the uprights. There are a number of such bolt holes to permit of adjusting the lever to various heights. The weight comes on the short arm of the lever and is lifted by depressing the long arm.

To hold the long arm in depressed position a rod is provided which is fastened to the lever at one end, while the other end passes between the uprights and is welded to a block of metal. This is adapted to bear against the uprights and serves as a catch to hold the lever at any desired adjustment. The rod shown in the drawing is three-eighths of an inch in diameter.

A HUGE WATER SYSTEM.

ENORMOUS COST AND EXTENT OF THE WORK NEEDED TO SUPPLY NEW YORK.

New York city adds another big city's population to itself every year. In this way an Albany, a Bridgeport, a New Haven or a Grand Rapids is annexed every twelve months; in two years a Jersey City is gained and in five a Boston, a Cleveland or a Baltimore. In order to provide an adequate supply of water for this growth of approximately 125,000 a year a plan was approved to obtain from the foothills of the Catskill mountains 500,000,000 gallons daily. The comprehensive plan includes the development of the watersheds of the Esopus, Rondout, Schoharie and Catskill creeks, but at the present time only the Esopus watershed is being developed with its available 250,000,000 gallons of water daily.

Starting at the 130,000,000 gallon Ashokan reservoir, holding enough water to cover Manhattan to a depth of twenty-eight feet and whose area is equal to all of Manhattan below One Hundred and Sixteenth street, an aqueduct 127 miles long is being constructed which will pass under deep valleys, the Hudson, Bronx and East rivers and the Narrows to Staten Island, supplying New York's boroughs, known as the Bronx, Manhattan, Brooklyn, Queens and Richmond. Near Valhalla, N. Y., thirty miles from the city hall, the aqueduct is interrupted by the Kensico reservoir, which acts as an emergency storage reservoir to prevent interruption of supply during the unwatering periods necessary for inspection between Ashokan and Kensico reservoirs. This reservoir will have the largest dam in the world, containing over 1,000,000 yards of masonry, and will store 40,000,000,000 gallons of water, which is sufficient to supply New York for seventy-five days or cover Manhattan Island to a depth of nine feet. Its shore line is 30.2 miles long.

The total estimated cost of building the 500,000,000 gallon aqueduct was \$176,857,000, of which about \$100,000 had been spent to March, 1912.—Engineering Magazine.

Most Important Minerals.

The great volume of the mineral production of the United States, its tremendous increase during the last few years and the wide distribution of the important minerals were indicated in a recent address by George Otis Smith, director of the United States geological survey. The twelve most important mineral products in the United States, in the order of value of annual output, were stated by Mr. Smith to be coal, iron, clay products, copper, petroleum, gold, stone, natural gas, cement, lead, silver and zinc.

1913 Resolutions.

Motorboat Bug Vows He Will Not
Talk Spark-Plugs and Gasoline
Till Summer.

I promise not to speak of boats, of plugs, or gasoline, Of steering-wheels, of strakes and keels, or storms that I have seen: I promise not to talk about the latest hydroplane, Or even think of motor-boats—till Summer comes again.

I promise not to talk of valves, of wire or motor oils, Reversing gears, or "how she steers," or chocks, or shafts, or coils;

I promise not to even talk about "the raging main," But I'll be twice the "bug" I was when Summer comes again.

California Proves Big Producer.

California was the largest producer of petroleum, asphalt, borax, gems and precious stones, magnetite, quicksilver, and platinum in 1911, according to the United States Geological Survey. The State was also the largest producer of gold.

Building Wrecked At Fish Egg.

Wireless reports from Fish Egg yesterday told of the wrecking of a Warehouse belonging to the Lindenberger Packing Company, during a severe blow.

To Join Elks.

Mr. and Mrs. R. L. Cole, Mr. and Mrs. J. G. Grant, B. Y. Grant and C. M. Coulter, took passage on the Dolphin Wednesday for Juneau, Messrs. Cole, B. Y. Grant, and Coulter will join the Juneau Lodge of Elks.

Current Comment.

The Japs have taken to eating beef in order to grow tall, while we have quit eating it because we are short.—Washington Post.

The refusal of compensation by the railroad wage arbitrators for their labor of months is a splendid example of generous and disinterested public service.—New York Tribune.

It is reported that American millionaires are being skinned by London art dealers. But any body that can skin an American millionaire is entitled to the peat.—Cleveland Leader.

New York has a fine college for teaching men to become bremen. Unhappily, that sort of knowledge seems necessary. But the best rule for fighting fires is this: "Prevent them!"—Cleveland Plain Dealer.

Cake walk Brings

Blackface Maskers.

Owing to the special prizes offered for cake-walkers, an unusual number of blackface maskers were present at the Orchestra's Masked ball. The other costumes were excellent and everyone enjoyed the evening.
